

MAY 13, 2026: ASEPTIC FILL/FINISH MANUFACTURING & PACKAGING SEPTEMBER 16, 2026: ORAL SOLID DOSE MANUFACTURING & PACKAGING

OPPORTUNITY SUMMARY

Now in its fourth year, Virtual Pharma Expo gives equipment and technology suppliers a proven way to connect with pharmaceutical manufacturing and packaging professionals. Each live session delivers a qualified audience of buyers seeking solutions to real production challenges. Presenters gain a platform to demonstrate expertise, showcase equipment in action, and engage directly with decision-makers focused on process improvement.

Brought to you by Pharmaceutical Online and Techceuticals, and supported by Federal Equipment Company, this virtual format eliminates the logistics of traditional trade shows while maintaining the visibility, credibility, and interaction suppliers value most. Sponsors benefit from pre- and post-event marketing, attendee engagement, and extended reach through on-demand exposure on STREAM, Life Science Connect's professional video platform.

DELIVERABLES

Online Presentation

- 15-minute presentation highlighting core service capabilities and areas of specialization
- Option to include live PowerPoint, pre-recorded video, or facility tour
- Live Q&A with attendees
- Optional pre-event video development (additional fee)
